

Digital offset printing is a unique low cost method for producing superior quality fabric graphics. Our customized equipment allows for as few as 50 banners to be produced at pricing comparable to large volume runs. With our extensive selection of fabrics and ability to color manage individual elements of an image you are assured unrivaled options and accuracy.

Low Prices & High Quality

With Nichols customized Digital Offset equipment, you can now get the quality of offset sublimation with the low pricing of screen-printing.

Quick Turn Time

Our unequaled capacity allows us to produce 160 2' x 3' banners in as quickly as 4 days without compromising quality.

Wide Selection

We keep over 10 different fabrics in stock, ranging from a heavy durable poly duck to a sheer flowing voile. All stock materials are available flame retardant.

Exceptional Color

With our exclusive sublimation technology, we are able to produce fabric graphics that are vibrant in color and true to your original art. Our exceptional color management techniques allow us to isolate and adjust specific elements of a file.
